GM test harness/universal repair harness

Rostra Precision Controls is proud to release a new universal external wire harness repair kit and test harness for the General Motors 4L60-E, 4L80-E, 4T80-E, 4T65-E, 4T45-E and Allison LT series transmissions. Rostra part number 350-0083 incorporates 21 lead wires (all white) capable of repairing GM's most popular vehicles. Please contact your transmission parts supplier for price and availability or go to www.rostratransmission.com to find a local distributor and see the full line of Rostra wire harness repair kits.
