Ford A4LD solenoid kit and case connector

Rostra Precision Controls offers the perfect solution for the recently discontinued Ford A4LD solenoid parts. Our four-piece kit includes a 3-4 shift solenoid and valve, the lock-up solenoid and the three-prong case-through electrical connector. Rostra solenoid kit number 52-9005 should be installed during the rebuild process to guard against unwanted comebacks. Please contact your transmission parts supplier for price and availability or go to www.rostratransmission.com to find a local distributor. 52-9005 and availability or go to www.rostratransmission.com to search our product offering and find a local distributor. 52-9027
