

New Product Announcement

Ford RWD Differential Speed Sensor

Rostra Precision Controls is proud to introduce the rear differential mounted vehicle speed sensor (VSS) for virtually all Ford rear-wheel drive vehicles. We currently have inventory available for immediate delivery on part number 50-1137.

This sensor monitors vehicle speed as it related to the driven wheels and sends a signal back to the main electronic control module to help govern the electronic functions of an automatic transmission. It has a high rate of replacement due to its location in the vehicle. This sensor should be replaced with each transmission overhaul or on all vehicles with 50,000 miles or more on the odometer.

Please take a few minutes to review the following important information. We look forward to filling your future sales requirements with this new item.

Original Equipment part number: F85Z-2L373-AB

Vehicle Applications: Ford RWD trucks, vans and cars with E40D, 4R100, 4R55E, 5R55E, AODE and all 4R70 applications.

Production years: 1990-on

Function: Vehicle Speed Sensor, Differential mounted

Rostra part number: 50-1137

Industry part #'s: 36951C, D36436B, 20A-300

Case quantity: 25

Lead-time: 7 days

Please contact Tom Eibel for additional information. As always, we appreciate your continued support of Rostra Precision Controls.
